RESTAURANT POS
by Neurixa Solutions

Evaluate WingerX POS with your own menu

Already using Petpooja or another POS? Use a 30-minute demo to see how WingerX would work at your outlet and what a switch would involve.

What we'll review with you

Billing and kitchen	Walk through a dine-in or takeaway order, from the kitchen ticket to the receipt and end-of-day sales. Review the printers and integrations your team relies on.
Menu and sales data	Review a sample export to identify what can move, what you should archive, and how you would export your records from WingerX.
Cost and rollout	Get a quote that breaks out setup, subscription, hardware, and support. Discuss what it would take to trial WingerX at one outlet.

Bring to the demo

Three menu items, a sample bill with customer details removed, and your printer model.
